(54) Title: METHOD FOR CONTROLLING COMMUNICATION CHANNELS AND BASE STATION AND TERMINAL THEREFOR

(54) Titre : PROCEDE DE CONTROLE DE CANAUX DE COMMUNICATION ET STATION DE BASE ET TERMINAL METTANT EN OEUVRE LE PROCEDE

(57) Abstract: The invention concerns a method which consists in allocating to a base station, at a control member of the base station, a list of channels shared by several terminals containing several sets of shared channels. For a communication session between the base station and a specific terminal, it consists in indicating to the terminal the list of shared channels allocated to the base station. At the base station, it consists in selecting for the terminal one of the sets of shared channels, and independently of the control member, indicating the selected set to the terminal via a dedicated channel.

Declaration under Rule 4.17:

- of inventorship (Rule 4.17(iv)) for the following designation US

(57) Abrégé : On alloue à une station de base, au niveau d'un organe de contrôle de la station de base, une liste de canaux partagés par plusieurs terminaux composée de plusieurs ensembles de canaux partagés. Pour une session de communication entre la station de base et un terminal donné, on indique au terminal la liste de canaux partagés allouée à la station de base. Au niveau de la station de base, on sélectionne pour le terminal l'un des ensembles de canaux partagés et, indépendamment de l'organe de contrôle, on indique l'ensemble sélectionné au terminal par l'intermédiaire d'un canal dédié.
